Global Conference On the Future of Hospital Pharmacy

FIP GLOBAL CONFERENCE ON THE FUTURE OF HOSPITAL PHARMACY SUCCESSFULLY COMPLETED

3 September 2008, Switzerland - Hospital pharmacists from around the world met in Basel, Switzerland and successfully developed 74 consensus statements reflecting the profession's preferred vision of practice in the hospital setting. The Global Conference on the Future of Hospital Pharmacy was hosted by the FIP Hospital Pharmacy Section as part of the 68th Annual Congress of the International Pharmaceutical Federation (FIP).

A total of 348 registrants representing 98 nations met on 30 and 31 August to develop and endorse the list of goals and objectives. Following two days of debate and discussion, all of the consensus statements were approved by the assembled delegates. The statements cover all areas of the medicine use process in hospitals, including the procurement of medicines, preparation and distribution, prescribing, administration of medicines, and the monitoring of patient outcomes. In addition, issues related to human resources and training were addressed. Medication safety was an important consideration in all consensus statement development.

Une enquête préalable de pratique professionnelle de la Pharmacie Hospitalière dans le monde

- Projet du Bureau de Pratique Professionnelle de la FIP
- Objectifs:
 - Un état des lieux de la pratique professionnelle en pharmacie hospitalière dans le monde
